Skilled in Manual Testing, API testing, etc. Strong engineering professional with a Software Engineering from COMSATS Institute Information Technology Abbottabad

WORK EXPERIENCE

1 AUG 2022 – CURRENT Lahore, Pakistan
SQA AUTOMATION ENGINEER ICOMMUNIX LTD

In my role as a Quality Assurance Engineer at ICOMMUNIX, I specialize in web and API testing, ensuring the seamless integration and functionality of our applications. I actively monitor debugging results, swiftly identifying and resolving issues to maintain application stability. Developing and applying effective testing processes is a core responsibility, aligning with client needs and industry standards. My proficiency in manual testing complements my focus on automation using Cypress, streamlining testing procedures for enhanced efficiency. I create and review detailed test cases, participate in regression testing, and engage in daily team meetings for collaborative project planning. Biweekly meetings with Product Owners ensure alignment with development goals. Leveraging Datadog for automation testing, I monitor application performance, identify bottlenecks, and contribute to ongoing software quality improvement.

1 DEC 2021 – JUN 2022 Rawalpindi, Pakistan
JR. SQA ENGINEER APPTRICK LTD

In my past role at APPTRICK, I played a pivotal part in developing and implementing robust testing processes for both new and existing products, ensuring alignment with client needs. My responsibilities included closely monitoring debugging results to swiftly identify and address issues, contributing to the overall reliability of our applications. I specialized in designing and creating tests, with a focus on API testing and comprehensive manual testing for both Android and iOS applications. This involved creating and reviewing test cases after manual testing to maintain a high standard of quality. Additionally, I actively participated in daily stand-up meetings with the Team Lead and members, fostering effective communication and collaboration within the team.
